Re: voting equipment

To Whom it May Concern:

Voting equipment across the country is aging. Iroquois County is no exception. We are currently looking at a variety of new products offered by several different vendors. While our equipment is still in good working order and we intend to use it several more elections, it is our belief that it will need to be updated at some point in the next four to five years. It may be cost prohibitive for most counties, including Iroquois, and it is our hope that federal money becomes available to help defray the substantial costs.

Thank you.
