COVID-19 UPDATE

As of 05/08/2020 Iroquois County has 87 individuals with laboratory confirmed cases of COVID-19. At the time of this press release the Iroquois County Public Health Department has received 552 test results for COVID-19. Of the 552 results, 465 have been negative and 87 have been positive. Here is the information that we can release about our recent cases:

- Case 85: Female in her 50's
- Case 86: Female in her 50's
- Case 87: Male in his 20's

Of the 87 individuals with laboratory confirmed cases, 25 have recovered and have been released from isolation, 5 are hospitalized, and 55 remain isolated at home.

The Iroquois County Public Health Department is saddened to announce a second death of an Iroquois County resident, a female in her 90's, who was positive for COVID-19. We extend our prayers and deepest condolences to the family, friends, and community members affected by this loss. At this time we are not providing any additional details on this individual. We kindly ask that the public respect the privacy of this family during this difficult time.

No additional details will be provided regarding any of the above Iroquois County residents per compliance with 77 Ill. Adm. Code 1005. Please visit <http://www.ilga.gov/commission/jcar/admincode/077/07701005sections.html> for further information regarding the Collection, Disclosure, and Confidentiality of Health Statistics.

For zip code level information on confirmed positive COVID-19 cases please visit the IDPH Virtual map at: <https://www.dph.illinois.gov/covid19/covid19-statistics>

For information on long term care facilities with cases of COVID-19 among residents and staff please visit the IDPH map at:

The Iroquois County Public Health Department is reporting congregate data regarding COVID-19. In an effort to clarify this data, we would like to provide a brief explanation. A confirmed case is an individual residing in Iroquois County who has a positive laboratory confirmation of COVID-19. The total confirmed case numbers we report includes all individuals who have tested positive, regardless of their current status. This number will never decrease. Recovered cases are individuals who tested positive and after a period of ten days, are afebrile (fever free without fever-reducing medication) for at least 72 hours and respiratory symptoms have improved. These recovered cases are then released from isolation by the health department.

This is a rapidly evolving situation and the Iroquois County Public Health Department will provide updated information and guidance as it becomes available on our Iroquois County Public Health Department Facebook page and website at <http://www.co.iroquois.il.us/covid-19-corona-virus/>
